PROFILE

As a Full-Stack Engineer, I build scalable and high-performance web applications using React and modern JavaScript. I focus on writing clean, maintainable code and creating smooth, user-friendly interfaces. For advanced interactions, I use GSAP to deliver fluid animations and Three.js to build immersive 3D UI experiences. On the backend side, I work with Supabase, Drizzle ORM, and modern authentication solutions to build secure and efficient systems. I also follow best practices such as clean code, design patterns, and scalable architecture.I build modern web applications including business websites, SaaS platforms, and AI-powered apps. I focus on performance, scalability, and clean user experiences that drive real results.

WORK EXPERIENCE

Front-End Engineer Intern @ Talent Corner
HR Services Pvt. Ltd.
2025 - 2026

- Worked on building and enhancing Saarthi360, a comprehensive CRM & HR management system used internally by the company and its franchisees.
- Built Saarthi360, a CRM & HR platform with multi-tenant architecture.
